Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Claims 1,2 are rejected under 35 U.S.C. 102(e) as being anticipated by Helm et al. (6,805,697).

With respect to claims 1, 2, Helm et al disclose a method of replacing a natural vertebral disc, the method comprising the steps of removing at least a portion of the vertebral disc, leaving an intervertebral space between opposed vertebral end plates, inserting a deflated balloon into the space, injecting a first liquid into the space until proper intervertebral spacing is achieved, aspirating all of the first liquid from the space and measuring the withdrawn volume of the first liquid, injecting the same volume of a hardened material to harden in the space, without withdrawing the balloon, thereby

Art Unit: 3732

forming a stable mass conforming in shape to the intervertebral space, as set forth in column 4, lines 35-44, column 9, lines 14-42

Allowable Subject Matter

The following is a statement of reasons for the indication of allowable subject matter: The prior art does not teach or fairly suggest a method of replacing a natural vertebral disc comprising the steps of inserting a first deflated balloon in the space, placing a second deflated balloon within the first balloon, thus defining a second chamber between the first balloon and the second balloon and injecting a first material in the first chamber and injecting a second material in the second chamber and allowing the second hardenable materials to harden, without withdrawing either balloons.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
